The Boys

The Boys is an American superhero streaming television series developed by Eric Kripke for Prime Video.

The Boys is set in a universe where superpowered individuals are recognized as heroes by the general public and work for the powerful corporation Vought International, which markets and monetizes them. Outside of their heroic personas, most are arrogant and corrupt. The series primarily focuses on two groups: the Seven, Vought's premier superhero team, and the eponymous Boys, vigilantes looking to bring down Vought and its corrupt superheroes.

Teams

The Boys are led by Billy Butcher, who despises all superpowered people, and the Seven are led by the narcissistic and violent Homelander.

The Boys are led by Billy Butcher, who despises all superpowered people, and the Seven are led by the narcissistic and violent Homelander. At the start of the series, the Boys are joined by Hughie Campbell after a member of the Seven accidentally kills his girlfriend, while the Seven are joined by Annie January, a young and hopeful heroine forced to face the truth about those she admires. Other members of the Seven include the disillusioned Queen Maeve, drug-addicted A-Train, insecure the Deep, the mysterious Black Noir, and white supremacist Stormfront. The Boys are rounded out by tactical planner Mother's Milk, weapons specialist Frenchie, and superpowered test subject Kimiko. Overseeing the Seven is Vought executive Madelyn Stillwell, who is later succeeded by publicist Ashley Barrett.

The Boys

Billy Butcher

A former member of the British special forces turned vigilante, Billy Butcher is as charming as he is cunning. He's a force of nature, who can talk almost anyone into anything, either through a smile or brute force – or sometimes both. He's consumed by one mission in life: to destroy superheroes.

Hughie Campbell

The only light in his life is the love of his life: his girlfriend, Robin. That is, until a speedster superhero named A-Train runs through Robin, eviscerating and killing her on impact. Desperate for revenge, Hughie's recruited by anti-"Supe" vigilante Billy Butcher, and Hughie's world is turned upside down as he finds himself caught in the middle of a war against superheroes – who, as it turns out, are neither super nor heroic.

Mother's Milk

Marvin T. "Mother's" Milk, or M.M., is one of the main characters in the Amazon series The Boys and an original member of black ops group The Boys.

Who wants to rob a bank?
Frenchie

Frenchie (real name Serge) is one of the main characters in the Amazon series The Boys and a member of the vigilante group, The Boys. Despite his name, he is actually French - Algerian.

Kimiko

When The Boys find The Female imprisoned in a cage in a basement under high security, they mistake her for a victim in desperate need of saving. But as The Boys unravel the mystery of The Female, they follow a trail of blood and gore to learn that she's a badass who might just end up saving them instead.

The Seven

The Seven

Homelander

Homelander, who is occasionally referred to as John by Vought International, is the main antagonist in the Amazon series The Boys. He is the leader of The Seven, and the prime enemy of Billy Butcher, the leader of The Boys.

Queen Maeve

As a warrior, a feminist, a humanitarian, and second most powerful member of The Seven, Queen Maeve is the ultimate role model for little girls all over the world. But to reach such astonishing heights, she's had to make sacrifices along the way. Embracing the image that Vought demanded she accept meant abandoning the truths – and even some of the people – she held dear.

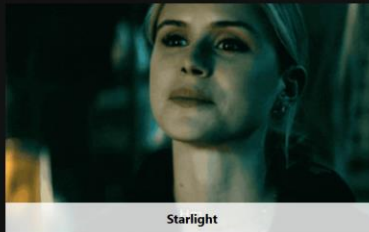

Black Noir

Silent, stealthy, and enigmatic, Black Noir is The Seven's superpowered ninja. His super strength and heightened senses are matched only by his proficiency in the martial arts. Criminals run in terror at the mere mention of his name. Little is known about this lethal warrior, other than having trained with a master sensei to become the death dealer he is at present.

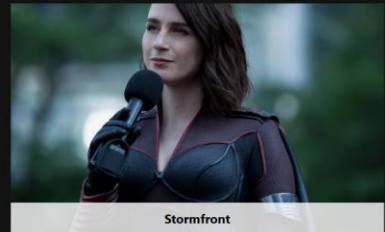

A-Train

A-Train (real name Reggie Franklin) is one of the main characters in the Amazon series The Boys. He is a speedster who used to be a part of the team known as the Teenage Kix, and is a returning member of The Seven. He inadvertently killed Robin Ward (Hughie Campbell's girlfriend) with his powers while high on Compound V, the event which ultimately lead to Hughie joining The Boys.

Starlight

Starlight (real name Annie January) is one of the main characters in the Amazon series The Boys. She's a member of The Seven, a group of superheroes. She was briefly excommunicated from the group after she was discovered to be a mole and ally of The Boys.

Stormfront

Stormfront (formerly known as Liberty, real name Klara Risinger) is one of the main antagonists of the second season of the Amazon series The Boys. She is a superhero who replaces Translucent as a member of The Seven.

Vought International

Vought was founded by Frederick Vought, a Nazi scientist who Hitler himself appointed as the chief physician at Dachau in 1939 where Vought would perform unethical experimentation on human test subjects in order to develop Compound V to enhance human beings into what are now known as Supes. Vought eventually created the first dose of Compound V and had his first successful Superhero, his own wife, Stormfront. When Vought realized the Nazi party's defeat was certain, Vought defected from Nazi Germany and the Allied forces smuggled him to the US and allowed him to give his newly developed Compound V to military soldiers to increase their odds against the Nazi Party. This prompted President Franklin Roosevelt to pardon him in 1944, and allow him to continue his research on Compound V and create more Supes, and gave him his own corporation to further the development of the Supes as an advanced race of living weapons. At some point after Vought died Stan Edgar would take over as CEO and (perhaps like his predecessor) would cover up any casualties caused by the Supes. Compound V is shrouded from the public, however, whom are led to believe that Supes are born genetically advanced and chosen by God. Instead, Compound V was shipped across the US to hospitals by Samaritan's Embrace under the guise of medical supplies. At the end of Season One, however, Hughie Campbell was able to stop the Compound V shipments by threatening to release damaging information to the public about Ezekiel.

Stan Edgar is the overarching antagonist of the Amazon series The Boys. He is the CEO of Vought International and Madelyn Stillwell's superior. He is also responsible for Compound V turning people into superhuman beings. After Stillwell's death, Edgar decides to take a more direct approach in managing Vought and its assets such as The Seven. After Madelyn Stillwell's demise, Stan decides to step into the limelight and becomes more directly involved in Vought International and it's assets. He continues the push for incorporating Supes in the military, holding a meeting with U.S. Secretary of Defense, Robert Singer, where Stan discusses chain of command, secret designations for Compound V and logistics for collateral damage. Sometime after Translucent's funeral, Stan hires Stormfront as Homelander's replacement in The Seven behind Homelander's back. Homelander confronts Stan about hiring Stormfront without consulting with him. When Homelander claims himself at Vought's most valuable asset and threatens to leave the company when his contract expires, Edgar proceeds to give a brief history of Vought's founder, Frederick Vought. Stan explains that Homelander is under the impression that they are a superhero company when in fact they are a pharmaceutical company and Homelander is not their most valuable asset, but Compound V is. He accuses him of distributing Compound V around the world to terrorists and says that Homelander is not as significant as he thinks he is.
